USER MANUAL AND SAFETY INSTRUCTIONS (EN)

Trade Name: **EPOXY LAMP**
Model / Type: **BITC**
Product Type: **Decorative portable indoor LED lamp made of epoxy resin and wood**

Thank you for purchasing our handmade product. Before using the lamp for the first time, please carefully read this user manual and the safety instructions. Keep this manual for future reference.

1. PRODUCT FEATURES

The **EPOXY LAMP BITC** is a decorative portable indoor LED lamp made of epoxy resin and wood.
The epoxy resin section of the lamp contains photoluminescent material that absorbs light from its surroundings and gradually releases it in the dark. Thanks to this property, the lamp can continue to glow softly even after the LED lighting has been switched off, without consuming electrical energy from the battery.
The intensity and duration of the afterglow depend on the amount and intensity of previous light exposure

2. TECHNICAL SPECIFICATIONS

- Power Supply: **Integrated rechargeable 3S1P Li-ion battery pack**
- Nominal Battery Voltage: **11.1 V DC**
- Battery Capacity: **2500 mAh**
- Charging Device: **External mains-powered charger for 3S Li-ion battery packs, 12.6 V DC / 1 A (included in the package)**
- Light Source: **Integrated LED strip, 12 V DC**
- Protection Class of the Lamp: **Class III (SELV)**
- Ingress Protection Rating: **IP20**
- Intended Use: **For use in dry indoor environments only**
- Battery Protection: **Integrated BMS 3S protection module**

3. COMPLIANCE WITH EU REQUIREMENTS CE

The **EPOXY LAMP BITC** has manufacturer-declared conformity with the applicable requirements of European Union legislation.

The manufacturer, **MPROF-ASISTENT s.r.o.**, confirms this conformity through the EU Declaration of Conformity, which forms part of the product's technical documentation.

4. OPERATING INSTRUCTIONS

1. Place the lamp on a stable, level and dry surface.
2. Switch the lamp on or off using the mechanical switch.
3. The lamp can operate using power from its integrated battery.
4. The lamp can also be used while the supplied external charger is connected.

The battery is permanently installed inside the lamp and is not intended to be removed by the user.

5. BATTERY CHARGING

1. Only use the supplied external charger designed for 3S Li-ion battery packs, with an output rating of 12.6 V DC / 1 A.
2. Connect the charger plug to the lamp's charging port.
3. Then connect the charger to the mains power supply.
4. Once charging is complete, disconnect the charger from the mains power supply and from the lamp.

The lamp may remain switched on and be used while charging.
Ensure adequate ventilation during charging and do not cover the lamp.

6. SAFETY INSTRUCTIONS

1. Only use the supplied charger. Using an unsuitable charger may damage the battery or cause a fire.
2. Never leave the lamp unattended while charging.
3. The product is intended exclusively for use in dry indoor environments. Protect it from water, splashing liquids and excessive humidity.
4. Do not expose the lamp to direct sunlight, open flames, heating appliances or temperatures above 40 °C.
5. Do not cover the lamp or place it in close proximity to flammable materials.
6. Do not open, disassemble or modify the product's internal electrical circuits. It contains built-in lithium-ion batteries.
7. Do not attempt to remove, repair or replace the battery yourself. If servicing is required, contact the manufacturer or the nearest qualified service centre.
8. In the event of mechanical damage, an unusual smell, smoke or excessive heating, switch off the lamp immediately. If it is connected to the charger, disconnect the charger from the mains power supply, provided it is safe to do so.
9. Do not use a damaged charger, cable or connector.
10. This product is not a toy. Do not allow children to handle the charger without adult supervision.

7. CLEANING AND MAINTENANCE

Before cleaning, switch off the lamp and disconnect it from the charger.
Clean the surface using a soft, dry or slightly damp cloth. Do not immerse the lamp in water.
Do not use aggressive chemical cleaning agents, solvents or abrasive materials.

8. DISPOSAL AND RECYCLING

The product contains a built-in lithium-ion battery pack and electrical and electronic components. Do not dispose of this product with ordinary household waste. Take it to an appropriate collection point for waste electrical and electronic equipment (WEEE).
Do not attempt to remove the built-in battery yourself. Its safe removal during waste processing must be carried out by a qualified person.

9. MANUFACTURER INFORMATION

Manufacturer: **MPROF-ASISTENT s.r.o.**
Registered Office: **Rúbaň 328, 941 36 Rúbaň, Slovakia**
Company Registration Number (IČO): **56628749**
Tax Identification Number (DIČ): **2122371042**
VAT Identification Number (IČ DPH): **SK2122371042**
Product Trade Name: **EPOXY LAMP BITC**

IMPORTANT NOTICE: Keep this manual throughout the entire period of use of the product. If you transfer the lamp to another person, make sure to provide this manual along with it.
